SANY

For challenging tasks, you need a first-class partner

Quality comes from experience. And from new ideas. This is why we combine these two crucial factors at SANY. This is because we are one of the world's leading producers, having sold more than **320 000** excavators in **10 years**. This means that you can always rely on sophisticated products that have been tried and tested in practice. An impressive **5-7%** of our annual turnover is dedicated to research and development.

COMPACT EXCAVATOR REDEFINED

Despite its compact design, the SANY SY135C displays impressive versatility and performance. The universal machine is outstanding at digging, crushing, loading and backfilling. Perfect for use in places where space is limited: In road and canal construction, inner city areas, horticulture and landscaping and demolition work. Its power allows it to reach high excavating forces which would otherwise only

be possible with significantly bigger machines. All that with an astonishingly large operating radius. This saves time, since the machine therefore needs to be moved far less often on the construction site. Talking of movement, the compact dimensions of the machine facilitate easy and safe transport.

TOP PROPERTIES

ECONOMY

STRONG PERFORMANCE WITH LOW FUEL CONSUMPTION

More work with less fuel – the SY135C's sophisticated engine and hydraulic concept makes this a reality. The hugely powerful diesel engine, equipped with common rail technology and AdBlue emission control, puts on a strong show with its maximum torque of 375 Nm and 1 800 rpm. A choice of various operating modes and automatic speed reduction optimise fuel consumption in a tangible way. This is where power meets efficiency. The total savings thanks to improved fuel efficiency result in significant economic benefits.

SY135C

ECONOMY

The right kind of pressure

Both powerful variable displacement axial piston pumps are operated in such a way that they only build up as much pressure as is actually required. This saves fuel and prolongs the life of the components.

In addition, its hydraulic system has a sophisticated structure, which reduces friction loss and pressure drops in the pipelines and ensures that power is transferred efficiently for all working conditions.

QUALITY

Quality is worth it High-quality components improve the machine's durability, while additionally increasing the intervals between each maintenance and service.

DIMENSIONS

Compact power – The SANY SY135C tackles work extremely efficiently as a compact excavator. High performance and impressive stability – the perfect combination to complete all tasks quickly and reliably on the construction site.

USER EXPERIENCE

Easy to maintain – The engine bonnet that can be fully opened and the clear arrangement of the key components in the centre make maintenance and service quick and easy.

QUALITY

With the benefit of robustness

Durability and robustness are standard features on all SANY excavators. The reinforced structure of the SY135C lends the chassis exemplary stability, thereby prolonging the machine's service life. What's more, all of the panels are made solely of metal, which makes them particularly resilient.

COMPONENTS

Flexibility as standard

The full hydraulic arrangement of the quick-change system guarantees that functions are perfectly integrated into the control menu, facilitating quick and safe attachment replacement. A further benefit is time and cost savings compared with regular retrofitting.

SAFETY

Comprehensive protection – In addition to the rotating beacon and the driving alarm, the safety package also includes the fenders above the shield cylinders.

COMPONENTS

Reliable drive – The tried-and-tested ISUZU-4JJ1X engine guarantees reliable performance in the long term, even in harsh working conditions.

ECONOMY

Efficiency and power – The smart control system adapts the pump capacity to the available engine power for greater cost-effectiveness and reduced fuel consumption.

USER EXPERIENCE

Control with feeling

The joystick control enables all functions of the excavator to be operated intuitively. The hydraulics valve control responds to commands immediately. Together with the automatic speed setting, this enables work to be carried out precisely and safely with higher efficiency and lower fuel consumption for the same operation. Not forgetting the large multifunctional monitor, which is easy to read and navigate, and displays all important information.

Our highlights – the added benefits SANY offers you:

- + A comfortable driver's cab with numerous extras
- + Robust, wide heavy-duty undercarriage
- + Hydraulic arrangement of the quick-change system
- + High-resolution colour display
- + High-quality machining thanks to robot-manufactured welded seams
- + Extensive safety equipment
- + LED work lighting

SAFETY

Minimising risks

Ergonomic handrails enable safe access to the maintenance platform. Large mirrors facilitate safe movement during operation, while the integrated safety valves keeps the boom and arm in position, even in the worst-case scenario.

USER EXPERIENCE

THE PREMIUM CLASS OF DRIVER COMFORT

A key feature of the SY135C is comprehensive comfort for its drivers. Excellent insulation around the cab provides reliable protection from noise and vibrations, as well as from high and low temperatures. The air-suspension driver's seat, provided as standard, offers the best possible comfort and protection from fatigue with its high seat backrest and various adjustment options. Plenty of space and room for movement, a radio and a 12 V jack, adjustable ventilation, heating and an automatic climate control system, a huge amount of stowage space, various options for storage and much more complete the comfort package.

DIMENSIONS

EVERYTHING WITHIN REACH

The SY135C impresses on-site thanks to its stability and stableness, meaning it brings its power quickly and safety to where it is needed. Its large working radius is also a plus point, with a maximum horizontal reach of 8290 mm and maximum excavation depth of 5500 mm. The heavy dozer blade ensures additional stability.

ENGINE

Model	ISUZU 4JJ1X
Typ	Water-cooled, 4 cylinder, with commonrail and Adblue
Exhaust emissions	Tier 3
Rated power	73 kW /2000rpm
Max. torque	375 Nm / 1600 rpm
Displacement	2999 ccm
Batteries	2 x 12V / 120 Ah

SERVICE REFILL CAPACITIES

Fuel tank	245 l
Engine coolant	23.6 l
Engine oil	15 l
Drive (per side)	1.8 l
Hydraulic oil tank	140 l

PERFORMANCE

Swingspeed	12 rpm
Max. travel speed	High 5.3 km/h, slow 3.1 km/h
Max. travel force	114 kN
Gradeability	35°
Bucket capacity	0.6 m ³
Groundpressure	0.39 kg/cm ²
Bucket digging force ISO	103 kN
Arm digging force ISO	67 kN

A SERVICE YOU CAN RELY ON

Just as we do with our excavators, we also demand high quality and reliability of our service products. This underlines our equipment's performance in terms of their durability and their excellent price-performance ratio. After all, maintenance is crucial

for efficiency, cost-effectiveness and safety. Your SANY dealer is happy to help you with a comprehensive range of services to ensure that your machine continues operating efficiently in the long term.

Global Brand, Local Knowledge

Flexible, fast, and always there for you

Rapid assistance, tailored advice, and a reliable supply of original parts all around New Zealand.

Our national service network provides certainty that you are supported with services and parts wherever you are located around New Zealand.

The Vertu Difference

- + Site visits to get your machine back up and running as soon as possible.
- + Significant inventory of SANY genuine and after market parts and attachments.
- + Expert knowledge including SANY trained technicians.
- + If a repair cannot be undertaken on-site or in good time, Vertu will arrange a similar replacement while your machine is repaired under warranty.

Parts supply – quick and reliable

With the purchase of a SANY compact excavator you have made an investment in the future. Fast availability of spare parts is your guarantee of minimal downtimes and failure times.

Detailed information in black and white

Handbooks and documents are available for all SANY compact excavators, and these can help you with operation, maintenance, servicing and repairs. These include operating and maintenance instructions and technical specifications.

PERFORMANCE YOU CAN RELY ON

The SY135C resoundingly proves that the performance of a compact excavator is not necessarily determined by bulky size. Weighing a total of almost 15 tonnes, it offers the optimum ratio of power to manoeuvrability. In addition, the robust, wide heavy-duty undercarriage and the robust dozer blade provide a high level of stability. This allows it to optimally apply its power – for a comprehensive range of applications anywhere where larger machines have to fit.

QUALITY IS WORTH IT

High-quality materials and careful machining are the basis for a **long service life**. This is part of a sophisticated concept: For example, the boom on the **topside and underside is manufactured from one single sheet** and welded continuously from front to back.

COMPACT POWER

The machine offers **excellent excavating forces at maximum stability** for its class.

EASY TO MAINTAIN

All routine checks and work on the machine can be carried out quickly and easily. For example, the machine's various bearings can be lubricated with **grease nipples from just one point**.

COMPREHENSIVE PROTECTION

Safety for users, machines and the working environment is of the utmost importance at SANY. The SY135C's **safety equipment** includes, amongst other features, **a driving alarm and rotating beacon, an overload warning** for lifting, **safety valves** and of course the corresponding **protective plates over the blade cylinders**.

RELIABLE DRIVE

The powerful **ISUZU-4JJ1X engine** with AdBlue emission control ensures the correct forces are applied for all tasks.

EFFICIENCY AND POWER

In conjunction with the electronic fuel injection, the **autothrottle function** adjusts the engine speed to the power required. This means that the smart hydraulic system **reduces the fuel consumption**, engine wear and exhaust emissions.

TECHNICAL HIGHLIGHTS

Engine	ISUZU 4JJ1X
Rated power	73kW / 2 000 rpm
Max. torque	375 Nm / 1 600 rpm
Max. travel speed	5.3 km/h
Swingspeed	12 rpm
Mainpump	2 x variable-piston-pump with electronic positive control
Max. oilflow	2 x 110 l/min
