# COMPACT TRACK LOADER

As a kind of compact earthmoving machinery, the compact track loader is nimble and able to pivot 360 degrees in place by utilizing the speed difference between the two side rubber track. Benefitting from the design of quick couplers, different attachments can be attached in minutes to meet various demands in general construction, agriculture, utility, and landscaping.

ST230V is a new masterpiece of SANY. Based on SANY excavator's mature R&D platform and rigorous testing system, its durability has been tested for more than 3000 hours. And it will have an awesome performance because of its following six highlights.

# SIX HIGHLIGHTS

Comfort

Safety

Intelligence

Efficiency

Accessibility

Versatility

Ergonomic Joystick

Adjustable Air Outlet

Safety Armrest

Suspension Seat

Adjustable Air Outlet

## Spacious cab

- ◎ The cab providing ample space and depth for a comfortable experience.

## Low noise

- ◎ Adopting an integrated cab with good sealing.
- ◎ The temperature-control fan with large diameter can dissipate heat independently, making low noise.

## Work with open front door

- ◎ It's accessible to work with open front door which can be flipped up to the top of the cab through an unique connecting rod mechanism.

## Air conditioning system

- ◎ Integrated cooling and heating, powerful and comfortable.
- ◎ Wind speed and direction, foot blow and defrosting, adjustable as desired.

## Touch display

- ◎ 7-inch LCD screen, anti-glare.
- ◎ Integrated with the control of equipment including rearview camera, air conditioning, radio, etc.

## Ergonomic designs

- ◎ The safety armrest features a streamlined design and armrest function, providing a comfortable and fatigue-free support.
- ◎ The joystick, buttons, and scroll wheel are arranged according to ergonomics for comfortable operation.

## Considerate designs

- ◎ Considerate designs such as 12V power socket, cup holder, storage bag, etc., for convenient use by the operator.

## Multiple protection

- ◎ It's necessary to lower the safety armrest and unlock the one-click before operating the machine.
- ◎ Equipped with ROPS&FOPS cab, side window protection net, boom safety rod, and rotating warning light to ensure safety.
- ◎ Equipped with emergency unloading valve and escape window, practicing the concept of "life is the most important, and there is no price for life."

**SAFETY ARMRESTS:** The safety armrests must be lowered before any operation.

**PROTECTIVE NET:** It prevents personnel injuries caused by splashing or falling stones, etc.

**ROTATING WARNING LIGHT:** It always reminds people around to maintain a safe distance.

**EMERGENCY UNLOADING:** Lower the boom in emergency situations to ensure safety.

**ESCAPE WINDOW:** Emergency exit.

## Visibility

- ◎ The reversing camera system and interior rearview mirror provide an ideal view behind the machine.
- ◎ Panoramic view design for front and sides to minimize unnecessary obstruction.

Front view + rear view + reverse image + rearview mirror

## Night lighting

- ◎ The high-brightness LED lights are equipped at the front and rear. The combined tail light integrates lighting, warning and steering functions to ensure construction safety at night.

### Smooth shoveling

- ◎ No spreading happens in shovel transport as for its configuration of ride control system and self-leveling system.

### Precise control

- ◎ The response and micro-mobility are great because of the hydraulic pilot control.
- ◎ Adopting DA power distribution technology to prevent flameout intelligently.

### Intelligent operation

- ◎ One-click startup is available to eliminate the trouble of carrying the key. And a password can be set to ensure the safety of your equipment.
- ◎ The maintenance reminders and fault alarms can be seen in the display by the transmission via CAN bus, allowing for real-time monitoring of machine status.

## POWERFUL

- ◎ Both the power and traction are strong benefiting from its powerful YANMA engine and a low-speed and high-torque motor.
- ◎ Based on its vertical lifting structure, large breakout force was achieved through the combination between the excellent point design and strong thrust cylinder.

## EFFICIENT

- ◎ Configured with dual speeds, with a maximum speed of 13.2 km/h / 8.0 mph, achieving efficient transfer.

Maximum hinge pin height  
3060 mm / 120.5 in

## HIGH UNLOADING HEIGHT

- ◎ The maximum hinge height reaches 3060 mm / 120.5 in, making truck loading easier.

## PIVOT 360 DEGREE IN PLACE

- ◎ It can pivot 360 degree in place benefiting from its compact structure, making it possible to work in confined spaces.

# MULTIFUNCTIONAL

## Versatility

Standard and high flows are available, making that various attachments can be used to meet different assignments, such as buckets, sweepers, snow blowers, cold planers, forks, forest mulchers, etc.

### Spacious and accessible

- ◎ The tailgate can be opened fully, and the mesh cover can be flipped up, allowing for easy access to all parts from the ground during routine maintenance.
- ◎ The entire cab can be flipped backward, providing enough spaces for inspecting and repairing components such as pumps, motors, and valves, making maintenance convenient.
